

imuZZic collective network

A collective of musicians ?

An artists network ?

A musical company in a variable geometry ?

What's imuZZic ?

A collective because everybody gathers around jazz and improvised musics aesthetics;

A network because it is opened to experiments, to new and fecund meetings

In a variable geometry because every project requires a complementarity of talent in a high level of requirement, coherence and artistic pertinence.

The imuZZic project

Jazz and improvised musics have an opening at least equal to the mind of freedom which this artistic field demands, we find in objectives of imuZZic since its creation the echoes of these characteristics: meetings between confirmed and emergent artists, meetings between different musical styles, meetings between different artistic disciplines (video, multimedia , poetry, cinema)..

In the whole world

Since 2004, more than 50 artists participated to the imuZZic collective projects,

6 creations were done, like : «October», « The Man with the movie camera », «Panics», « The mad Shepherds of the rebellion », « Round about 68 »

6 albums has been recorded, among whom the last 4 for Cristal records label « 5 new dreams », «l.Overdrive trio», « new dreams nOw! », «Global Songs», «Etats d'urgence»'

The different projects were introduced in France, and abroad (Canada, China, Hong Kong, Korea, Morocco, Greece, Romania, Ukraine, Ireland, Germany, Switzerland).

These more than 200 concerts were given in very various contexts : from small places not devoted to concerts to International Jazz Festivals, jazz clubs, theatres, national concert halls... Without forgetting artistic residences, interventions in schools, master - classes...

The base of the collective

Bruno Tocanne drums
Rémi Gaudillat trumpet
